VF20 Series

Vector Control Inverter

www.allsai.com / info@allsai.com

Introduction

VF20 series inverters feature excellent drive and control performance for using of sensorless vector control technology, and improve usability and reliability for the enriched hardware configurations and software functions, meeting different industrial applications.

DRIVES

Features

Optimized structure design

Optimized spare utilization, models ($\geq 18.5\text{kW}$) is much smaller than existing inverters.

Size compared with VF200A

Power Rate	Size of VF20 (W*H*D)	Size of VF200A (W*H*D)	Size decreased than VF200A
18.5kW	200*340.6*184.3	230*342*216	26%
22kW	200*340.6*184.3	255*407*245	51%
30kW	250*400*202	255*407*245	21%
37kW	250*400*202	270*555*325	59%
45kW	282*560*238	270*555*325	23%
55kW	282*560*238	270*555*325	23%
75~110kW	338*554*329.2	325*680*365	24%

Mini design for inverters ($\leq 2.2\text{kW}$); abreast installation of multiple inverters, reducing installation space

Flexible installation ways

Inverters ($\leq 2.2\text{kW}$) support wall mounting and rail mounting.

Rail mounting

Wall mounting

Inverters ($\geq 4\text{kW}$) support wall mounting and flange mounting.

Excellent Performance

Excellent vector control performance

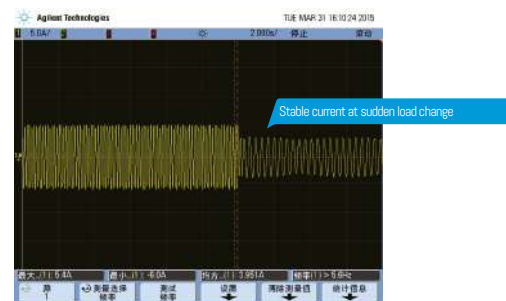

Current waveforms in vector control mode with 50Hz and full load

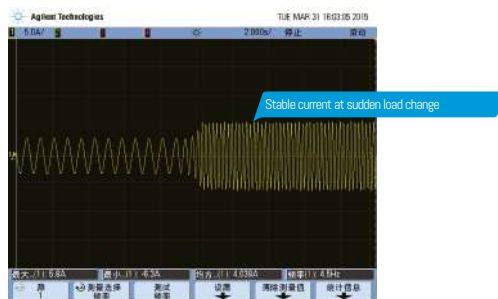

Excellent motor drive performance

Current waveforms when sudden loading in V/F control mode with 2Hz and full load

Current waveforms when sudden unloading in V/F control mode with 2Hz and full load

Current waveforms when sudden loading in vector control mode with 0.5Hz and full load

Current waveforms when sudden unloading in vector control mode with 0.5Hz and full load

Excellent high-frequency running performance

Current waveforms when sudden loading in vector control mode with 0.5Hz and full load

Current waveforms when sudden unloading in vector control mode with 0.5Hz and full load

Multi-function and easy to use

DC reactors are built-in inverters $\geq 18.5\text{kW}$

The braking unit is built-in and standard for inverters $\leq 37\text{kW}$ but optional for inverters of 45-110kW.

Dynamic braking can be implemented by only configuring braking resistors, reducing occupation space.

Inverters (380V; $\geq 4\text{kW}$) support the DC bus sharing solution.

Dynamic braking can be implemented by only configuring braking resistors, reducing occupation space.

Built-in Safety Torque Off function

VF20 series inverter support Built-in Safety Torque Off function, and passed the certification as followed:

Model	Certification standard and grade					
	IEC 61508		EN/ISO 13849-1		EN954-1	
-S2:0.4~2.2kW -2:0.4~0.75kW -4:0.75~2.2kW	SIL	2	PL	d	Category	3
-2:1.5~7.5kW -4:4~110kW	SIL	3	PL	e	Category	3

C3 and C2 filters

C3 filters are built in inverters (3PH; 380V; $\geq 4\text{kW}$) and (3PH; 220V; $\geq 1.5\text{kW}$) by using J10 to determine the connection or disconnection. External C3 filters can be configured for inverters (1PH; 220V; $\leq 2.2\text{kW}$), (3PH; 380V; $\leq 2.2\text{kW}$) and (3PH; 220V; $\leq 0.75\text{kW}$).

External C2 filters are optional for all VF20 series inverters.

Conductive interference test of the power supply terminals

Remarks:

C2 filter: EMC performance of the inverter achieves the limited usage requirement in civil environment.

C3 filter: EMC performance of the inverter achieves the limited usage requirement in industrial environment.

Support of external keypad

The membrane keypad are standard for inverters (380V; $\leq 2.2\text{kW}$), which also support external LED keypads. The keypads for inverters (3PH; 380V; $\geq 4\text{kW}$) can be used as external keypads.

VF20 series inverters can be configured with LED keypad which has the data copy function to upload or download the parameters.

Pluggable design for cooling fans, making maintenance easy

Abundant software functions

Function	Used to	Remarks
RS485 communication	Read and modify inverter parameters through connection to the upper computer so as to control inverter running status.	Configured with RS485 communication interface
PID	Carry out PID operation on feedback signals to control inverter output frequency and improve target accuracy and stability. Applicable to pressure, flow and temperature process control.	Supports PID output polarity switching.
Motor parameter autotuning	Carry out rotation or static autotuning, improving control accuracy and response speed.	Classified into rotation autotuning and static autotuning.
Simple PLC function	Change the running frequency and direction automatically according to the running time set by simple PLC to meet process requirements.	Supports multiple running modes.
Multi-step speed control	Meet the speed control requirements in different periods of time.	A maximum of 16 steps can be divided for multi-step speed control.
Multiple V/F curve settings	Meet the requirements of energy-saving operation for fans and water pumps and of various variable frequency power supplies; adapt to different load applications.	Linear, multi-dot, multi-power and V/F separation settings, implementing flexible setting of V/F curves.
Virtual terminals	Take external signals as local virtual I/O to reduce hardware configuration.	Corresponding virtual terminal functions must be enabled in communication mode.
Delay of switching on and off	Provide more programming and control modes	Max. switching on/off delay is 50s
Uninterrupted running in instantaneous power off	Ensure uninterrupted running in instantaneous power off. Especially applicable to the situations with high requirements on continuous operation.	At transient voltage drop, the inverter can keep running by feedback energy without stop in valid time.
Various protection functions	Provide overall fault protection functions.	Various measures provided to protect against faults such as overcurrent, overvoltage, undervoltage, overheating, and overload, whose information can be saved.
Multiple braking modes available	Provide multiple braking modes, satisfying accurate and quick stop under different loads.	DC braking, flux braking, dynamic braking
Battery capacity display	Display the accumulative power consumption on the inverter without watt-hour meter.	Inverter power consumption can be queried.

Perfect and Reliable Test System Ensure Products Adapt Complicated Site Environments and Achieved ACT Certificate of TÜV SÜD

Experiment Type	Experiment Name	Classification
Mechanical Reliability Experiments	Packaging Experiments	Package compression experiments
		Package Resonance imaging and storage test
		Package random vibration test
		Package dropping test
		Package rolling test
		Package dumping test
		Package inclined impact test
	Impact Test	Half-sine shock test(working and non-working state)
		Trapezoidal wave impulse test(non-working state)
	Vibration Test	Sinusoidal vibration test(working state)
Random vibration test(working and non-working state)		
Climatic Environmental Reliability Test	Temperature Experiment	Low temperature storage test
		High temperature storage test
		Low temperature working test
		High temperature working test
		Gradient temperature change test
		Temperature impact test
	Temperature Humidity Test	Constant temperature & humidity test
		Alter nation temperature & humidity test
	Salt Spray Test	Constant salt spray test
		Alter nation salt spray test
	Low Air Pressure Test	Combined dry heat & low air pressure test
		Combined cold & low air pressure test

Remarks:

The full name of ACT is Acceptance of Client's Testing, which means the German TÜV SÜD admit the technology level of the lab and accept their separate testing data and test reports officially.

Electric Vibration System

Low Pressure Test Chamber & Constant temperature and humidity test chamber

Faster temperature chamber & Thermal Shock Test Chamber

Applications

Textile machinery

Food machinery

Plastic machinery

Printing and packaging

Environmental protection equipment

Ceramic equipment

Woodworking equipment

Cable machinery

Technical specification

	Function	Specification
Power input	Input voltage (V)	1PH 220V (-15%)-240V(+10%) 3PH 220V(-15%)-240V(+10%) 3PH 380V (-15%)-440V(+10%)
	Input current (A)	Refer to the rated value
	Input frequency (Hz)	50Hz or 60Hz, allowed range: 47~63Hz
Power output	Output motor capacity (kW)	Refer to the rated value
	Output current (A)	Refer to the rated value
	Output voltage (V)	0~input voltage, error<5%
	Output frequency (Hz)	0~400Hz
Technical control feature	Control mode	SVPWM, SVC
	Adjustable-speed ratio	1:100
	Speed control accuracy	±0.2% (SVC)
	Speed fluctuation	± 0.3% (SVC)
	Torque response	<20ms (SVC)
	Torque control accuracy	10%
	Starting torque	0.5Hz/150% (SVC)
Running control feature	Overload capability	150% of rated current: 1 minute 180% of rated current: 10 seconds 200% of rated current: 1 second
	Frequency setting method	Digital setting, analog setting, pulse frequency setting, multi-step speed running setting, simple PLC setting, PID setting, MODBUS communication setting Shift between the set combination and set channel.
	Auto-adjustment of the voltage	Keep a stable voltage automatically when the grid voltage transients
Peripheral interface	Fault protection	Provide comprehensive fault protection functions: over-current, over-voltage, under-voltage, over-heating, phase loss and overload, etc.
	Analog input	1 (AI2) 0~10V/0~20mA and 1 (AI3) -10~10V
	Analog output	2 (AO1, AO2) 0~10V/0~20mA
	Digital input	4 common inputs, the Max. frequency: 1kHz; 1 high speed input, the Max. frequency: 50kHz
	Digital output	1 Y1 terminal output;
Others	Relay output	2 programmable relay outputs R01A NO, R01B NC, R01C common terminal R02A NO, R02B NC, R02C common terminal Contactor capacity: 3A/AC250V
	Mountable method	Wall and rail mountable
	Braking unit	Embedded
	EMI filter	Optional filter: meet the degree requirement of IEC61800-3 C2, IEC61800-3 C3
	Temperature of the running environment	-10~50°C Above 40°C, derate 1% for every additional 1°C.
	Altitude	<1000m Above 1000m, derate 1% for every additional 100m.
	Protective degree	IP20
	Safety	Meet the requirement of CE
Cooling	Fan cooling	

Selection

Type designation key

VF20-055G-4-B-EU

① ② ③ ④ ⑤

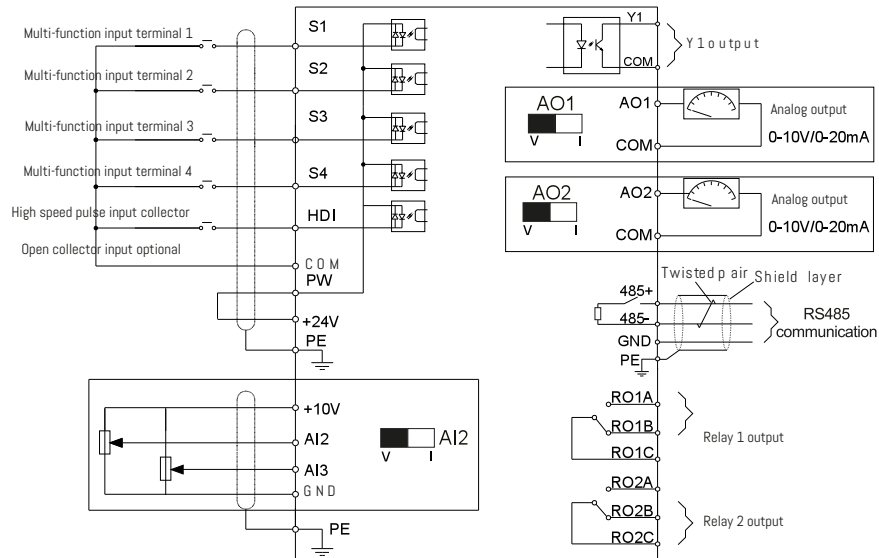

Key	No.	Detailed description	Detailed content
Abbreviation	①	Product abbreviation	VF20 is short for VF20
Rated power	②	Power range+load type	055-55kW G: constant torque load
Voltage degree	③	Voltage degree	S2: AC 1PH 220V(-15%)~240V(+10%) 2: AC 3PH 220V(-15%)~240V(+10%) 4: AC 3PH 380V(-15%)~440V(+10%)
Additional information 1	④	Braking unit	B: With built-in braking unit for inverters $\geq 45\text{kW}$; Standard inverters $\geq 45\text{kW}$ without built-in braking unit, B is not displayed
Additional information 2	⑤	Special function	EU: built-in Safety Torque Off function; Without EU, without the function

ACERCA DE ALLSAI

ALLSAI es una compañía con más de 15 años de experiencia en el mercado latinoamericano destacándose por innovar continuamente en las diferentes soluciones de respaldo de energía.

Actualmente contamos con un amplio portafolio de soluciones que agrega valor al negocio de nuestros clientes, logrando posicionar nuestra marca en toda la región con un sello de calidad y respaldo que hace la diferencia.
